

# Student Learning Outcomes

**Students completing the requirements for an Accounting Major degree in the College of Business will be able to:**

Record business transactions, prepare the basic financial statements, and analyze the results for decision making.

Understand the fundamental concepts of generally accepted accounting principles, generally accepted auditing standards, tax law regulations, and cost accounting applications as they apply to all types of businesses, government entities, and organizations.

Demonstrate proficiency with leading computerized accounting applications that are used in business settings.

Utilize an online CPA Review/other certification review in preparation for graduate study and for taking professional examinations in the accounting field.

Deliver accounting information by communicating effectively in professional roles.
